About the organization

VoerEir is a start-up founded in 2015, with the focus on helping telecom operators succeed with their NFV transformation. Within our first two years we have managed to get a list of coveted customers which we are extremely proud of. The list of costumers consists of several international tier one operators and some major suppliers.

Our team, young and hungry, has many years of experience from OpenStack, NFV, Telecom application development and VNF onboarding. We continue to upgrade our knowledge base through industry cooperation, open source community engagement, cooperation with university and most important assignments to evaluate and help to improve many different NFV infrastructures.
